

Darwin's 200th Birthday at Southern Illinois University Carbondale

Creationism's Trojan Horse: Intelligent Design Since the Dover Trial

Dr Barbara Forrest

Charles Darwin in photo by his son, Leonard

Dr Forrest will detail the changes in tactics forced on creationists who would impose their beliefs in science classrooms, following their comprehensive defeat in the Dover Intelligent Design trial of 2005. Dr. Forrest is Professor of Philosophy at Southeastern Louisiana University. She is a coauthor of *Creationism's Trojan Horse: the Wedge of Intelligent Design*, and was a key witness in the 2005 *Kitzmiller vs. Dover* trial that led to the judicial decision against teaching intelligent design in science classrooms.
